

Yousef Jalali

Self-taught front-end developer with a passion for continuous learning. Focused on creating intuitive user experiences. Innovative and driven.

PROJECTS

• VRBTM

Next.js, Tailwind & MongoDB

A web app to improve memory retention. Easily memorize text by omitting words manually or randomly. Create personal notebooks and modify them. Save flashcards based on your notes and more.

• Binder

Nx, Next.js, Styled-Components & MongoDB

Create, assign, and organize tasks into projects with due dates and priorities. Accessible on multiple devices, it lets you manage your tasks and projects from anywhere.

• WeatherNow

Next.js & Tailwind

Lets users get current weather of a location, and offers extras like saving favorite locations and viewing forecasts. The design is user-friendly and straightforward.

EXPERIENCE

• Plant Technician

Qatar Fuel (WOQOD) • 2019 — Present

Mesaieed Industrial City, Qatar

- Managed 16 staff members, ensuring 100% order production and dispatch.
- Constructed budgets, achieving a 22% reduction in operating expenses.
- Created 100+ checklists for proactive safety and efficiency.
- Developed method statements and procedures to improve procedural compliance.
- Presented financial information and KPIs to leadership 12 times per year.
